MEMORANDUM

TO: Council Members

FROM: Terry Morlan

SUBJECT: Presentation by Steve Wright

Steve Wright will speak to the Council about some of Bonneville's important priorities for this year and beyond. We do not have a list of issues that Steve will address but likely areas for discussion include:

- Current water conditions and their effects on power operations and rates;
- Bonneville response to the Sixth Power Plan in meeting near-term efficiency targets and in addressing 85 percent of load growth with efficiency improvements over the long-term;
- Challenges Bonneville faces to integrate large and growing amounts of wind power in their control area, much of it for export; and
- Bonneville's transmission expansion planning and projects;

This list may not be complete or comprehensive. We are advised that Steve will be happy to discuss additional topics in response to Council member concerns and questions. Some areas of potential interest to Council members might include Bonneville's Resource Program, the post-2011 conservation proposal, DSI service, the residential exchange, or river operations for fish.
